

## User Manual

Move your head around to navigate and slide the magnetic switch on the left side to click or tap and the images will respond

Tilt the cardboard 90-degrees to return to the main menu

## Instructions

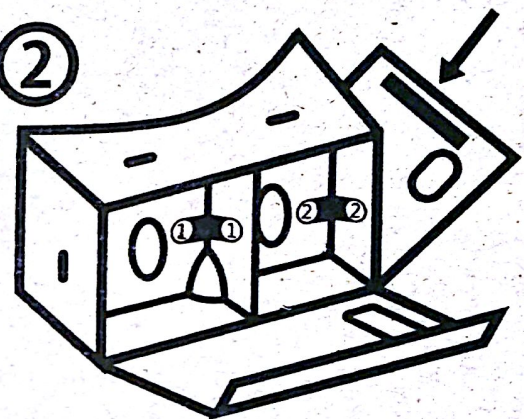

①

Put the 2 lenses (Convex side face down) in the middle of the eye piece part then fold. Make Sure that the hinges of the outer folds catch the lenses securely

## Adhesive tape

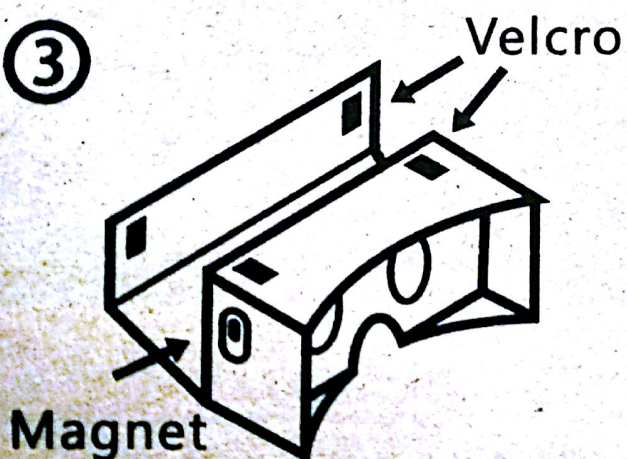

②

— Insert the folded centre eyepiece into the main chassis. Fold and insert into slots [numbers (1) and (1), (2) and (2)]

— Stick the parts with the adhesive tape

③

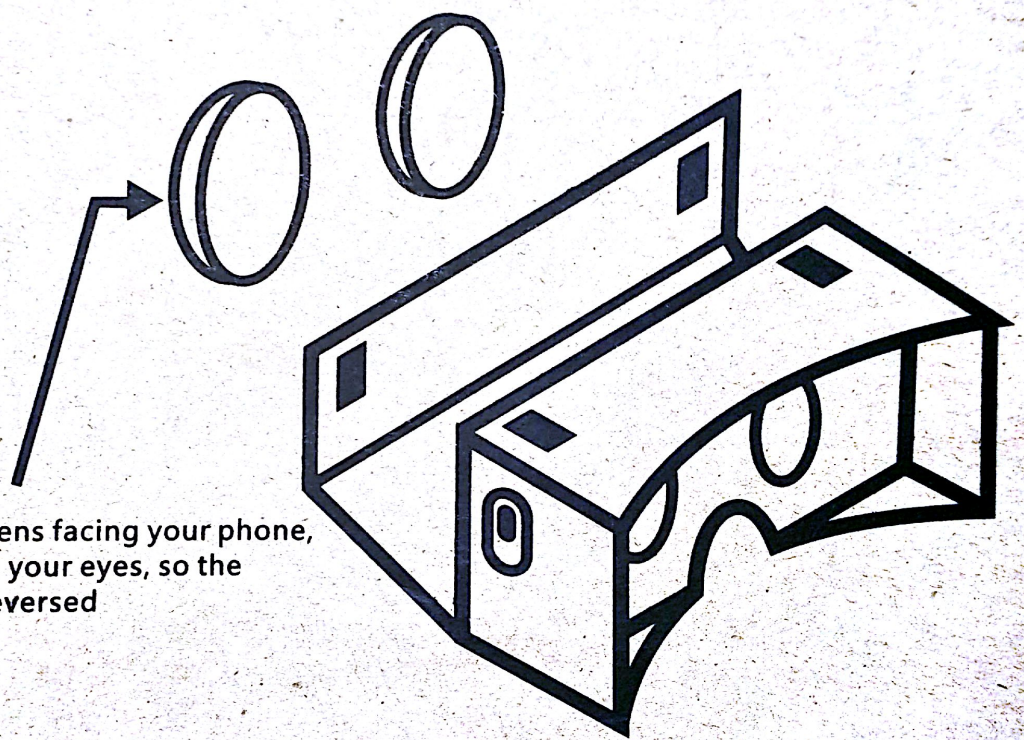

③

— Insert the magnets to the side

— Place the rubber band around the main body

— Put the velcro strips on the top flats  
Insert your mobile phone with the screen facing inwards towards the lens and enjoy

Place the convex lens facing your phone,  
the flat side toward your eyes, so the  
image will not be reversed
